-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The earlier indication of allowed material is regretted. An action on the merits follows.

#### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-4, 7-9, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Whitten (3,260,289). Note that the shaft and blade holder reciprocate relative to the bearing shaft 14.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitten. Absent a showing of criticality adding screw threads to connect the shaft and bearing 14 to the rest of the saw device would appear to be an obvious matter of design to be determined by an artisan.

Claims 6, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitten in view of Okubo et al. (5,988,034). Okubo shows a reciprocating saw with upper and lower bearings 2a and 2b. this arrangement lends support to the reciprocating shaft at two locations thus resisting forces on the blade more securely.

Art Unit: 3724

Obviously one of ordinary skill in the art would have knowledge of such mountings and would therefore add a lower bearing to the device of Whitten.

***Conclusion***

The remarks have been considered but are moot in view of the newly cited references.
